

## # MIST INSTALLATION GUIDE -- MAC USER

1. Install MAMP for get a running environment. Website link attached below.

> <https://www.mamp.info/en/mac/>

2. Open the terminal and type ``sudo apachectl stop`` to avoid port conflict with MAMP's apache.

3. Open 'MAMP', and click Start to initialize PHP, apache and mysql.

4. Open the Finder and follow the path->Applications ▸ MAMP ▸ htdocs to put all of the code under the htdocs file.

5. If the code includes createDB.sql, please open the terminal and type ``cd + 'path'`` to make sure it is located in the same folder as createDB.sql. type ``/Applications/MAMP/Library/bin/mysql -u root -p`` to open mysql, **\*\*(MAMP's mysql password is 'root')\*\***,

and then type ``source createDB.sql`` to create a database and tables for support running 'Mist'.

6. Open MAMP and click -> Preferences -> posts to get the post's number.

7. Open Browser and type ``localhost:`` + your posts number(default: 8888) + path.

> PATH: localhost:8888//mist/store/search/

8. All done! Enjoy you browsing !
